

Pole Basket

Designed to complement our hanging baskets

Pole Basket

Designed to complement our hanging baskets, with our trademark watering channel and unique slotting action to prevent the baskets from separating.

Our pole baskets are manufactured from tough, high quality recycled plastic and come complete with an integral reservoir for water conservation. They provide a very versatile low maintenance display that can be put almost anywhere.

They also feature a reusable liner for seasonal planting.

Pole baskets are an economical and environmentally friendly option to add high impact colour to both rural and urban communities.
