

Planting & Maintenance

As well as supplying planted baskets we also offer clients a bespoke planting service, making use of their existing baskets and tubs.

Planting & Maintenance

In addition to our quality products we offer a range of specialist planting and maintenance services.

From basic planting to the most complicated schemes Amethyst are able to support our clients directly or through their term contractor. This service has proved invaluable for easing seasonal pressures.

Our dedicated team will also maintain not only floral displays provided by us but those planted by other companies.

Regular maintenance visits throughout the year are essential to keep displays floriferous and healthy.
