

HORTICULTURAL
PRODUCTS & SERVICES

WELCOME

We are pleased to present our brochure showcasing our products and services since we started 20 years ago.

Since 2012 we have been operating from two nurseries with production areas covering 15 acres of Glasshouses, poly tunnels and external beds. We produce and sell in excess of 4 million plants per year.

Our range and quality of products and services are recognised throughout our different client sectors providing our clients with a complete solution, always in an environmentally and sustainable way.

Our commitment to customer service and quality has been recognised with the award of ISO 9001 continuously over the past 10 years.

We continue to invest in modern machinery and use where possible sustainable materials throughout our production and operational methods.

We are working closely with our extensive European suppliers to ensure Britain’s Biosecurity remains intact.

Our focus remains on you the customer, ensuring you receive a quality product delivered to your specification, on time. This year we will be launching a new website with an online ordering facility to provide a 24 hour service.

As always we like to talk, so please feel free to call anytime on 01795 522828.

ABOUT US

Amethyst Horticulture offers a range of products and services primarily to the amenity landscape market and those organisations involved in enhancing our urban environments.

Our primary objective is to treat our clients in a professional and personal way ensuring that we understand their needs and the products we offer are the correct solution. Whilst we invest heavily in technology we still consider that answering a telephone call is the foundation for a long and successful relationship.

Operating throughout the UK with distributors in North America and Europe the Company has developed a highly engineered, unique range of free standing and fixed self watering containers. These have become recognised as the most cost effective method of providing colourful, high impact displays within our town centres.

We offer a full range of plant material suitable for either large planting schemes or those schemes where individuality is required. With daily deliveries we are able to respond quickly to your requirements.

Urban regeneration has become a popular phrase and generally involves the provision of trees. For those trees planted within hard landscaped areas Citysand, our scientifically proven load bearing planting medium has become essential for tree survival.

All of our products and services from enquiry to delivery are subject to our rigorous quality control procedures.

NURSERY STOCK

Amethyst produce and supply high quality trees and shrubs for both the amenity and retail sectors.

To complement our own production we have extensive contacts throughout the UK and Europe which enables us to fulfil the most complex of planting schemes. Making us a great 'one stop shop' for landscaping contractors. To further complement the service we have also added a range of essential landscape sundries.

Utilising our specialist computer software we are able to offer fast, accurate and competitive quotations by email or fax.

Where possible it is our preference to deliver your order using our own vehicles, enabling us to be in full control of delivery schedules. For those clients who have restricted access we offer a timed delivery service.

All of our products and services are collated and delivered with strict adherence to our quality policy and ISO procedures.

We look forward to serving you in the future.

Our new webshop provides current stock availability and enables our clients to 24/7 access in placing orders or requesting quotes

FLORAL BASKETS & PLANTERS

Uniquely designed, our range of baskets and floral containers with an integral reservoir provide high impact displays.

The most cost effective and efficient option is to take advantage of our specialist growing facilities and hire the containers fully planted.

We also offer the option to purchase the baskets and planters for those clients who have their own growing facilities.

COSMOPOLITAN CUBE

For instant impact there is nothing to compare to our unique range of Cosmopolitan Cube planters.

Stack one, two or even three high to achieve high quality displays and maximum impact.

Integral reservoir for a low cost maintenance regime.

Dimensions (W x H x D): 650 x 650 x 650mm

Weight (unplanted): 15kg

Capacity: Compost volume 240 litres, water reservoir 40 litres

Download product sheets
and further information at:
www.amethyst-horticulture.co.uk

BARRIER BASKET

For maximum impact, barrier baskets are the easiest method to provide highly visible seasonal displays.

Complete with adjustable brackets and a reusable liner making installation and seasonal planting easier and more efficient.

Dimensions (W x H x D): 1000 x 290 x 400mm

Weight (unplanted): 6kg

Capacity: Compost volume 50 litres, water reservoir 25 litres

Download product sheets
and further information at:
www.amethyst-horticulture.co.uk

HANGING BASKET

The only traditionally styled self watering basket on the market that had been designed to mimic the shape of a traditional wire basket whilst encompassing an easy fill integral water reservoir.

Dimensions: 530mm Ø / 410mm Ø planting area
Weight (planted/unplanted): 6kg/25-30kg
Capacity: Compost volume 15 litres,
water reservoir 6 litres

Download product sheets
and further information at:
www.amethyst-horticulture.co.uk

POLE BASKET

Designed to complement our hanging baskets, our pole baskets feature our trademark watering channel and unique slotting action to prevent the baskets from separating.

This versatile basket can also be fixed to walls to replace high maintenance hayracks.

Dimensions: 400 / 600mm Ø
Weight (unplanted): 3kg / 5kg
Capacity: 400mm: Compost volume 10 litres,
water reservoir 5 litres / 600mm: Compost volume 15 litres,
water reservoir 7 litres

Download product sheets
and further information at:
www.amethyst-horticulture.co.uk

CASCADE THREE TIER PLANTER

Our unique tiered planter the 'Cascade' has been designed to allow for a variety of uses and enables you to create individual floral displays to suit your requirements.

Each component has been designed to operate in numerous configurations.

Dimensions (W x H x D): 1200 x 2400 x 1200mm

Weight (unplanted): 98kg

Capacity: Base: Compost 80 litres approx, Reservoir 80 litres per quarter section. Middle section: Compost volume 15 litres, water reservoir 7 litres. Top section: Compost volume 10 litres, water reservoir 5 litres

Download product sheets
and further information at:
www.amethyst-horticulture.co.uk

LYNSTED PLANTER

Our new Lynsted range of planters has been designed to compliment traditional and modern environments.

Manufactured from either softwood or hardwood these planters are available in a range of sizes and shapes.

Optional extras include a reusable metal liner and reservoir.

All timber is sourced from sustainable sources.

Made to Measure

HERITAGE BARREL

A unique modern design based on a traditional oak whisky barrel.

Available as either a full or half barrel complete with integral reservoir, these containers are ideal where space and access is restricted.

Dimensions (W x H): 650Ø x 465mm
Weight (unplanted): 6kg
Capacity: Compost volume approx 50 Litres,
water reservoir 40 Litres

Download product sheets
and further information at:
www.amethyst-horticulture.co.uk

MAINTENANCE & PLANTING SERVICES

Maintenance of seasonal or permanent planting is essential to the success of any environmental enhancement. Our maintenance options are flexible and bespoke to the individual project. This ensures maximum efficiency whilst producing the highest standards.

To maintain our status as a leading provider, our fully trained staff constantly monitor plant health for signs of malnourishment and pest and disease issues.

Continued investment in specialist machinery and the implementation of effective regimes ensures any issues are isolated and rare.

CITYSAND

Life today is high speed. The increase in motor vehicles has followed this with more cars and commercial vehicles on the road than ever before, which have in turn demanded bigger and better roads. The evolution of life in the fast lane has been to the detriment of our urban areas. Tree lined avenues have suffered as the air has literally been squeezed from the soil. As the trees start to decline, so the damage begins to occur. Paving is lifted and underground pipes are invaded by roots as the tree attempts to find oxygen. The direct result of this is that the tree becomes unstable or damages services. The incorporation of Citysand into our urban environment will help eliminate these problems.

What is Citysand?

Citysand is a highly specialised planting medium consisting of carefully selected grades of sand blended with green waste compost.

Tested both in laboratories and in situ, our blend is scientifically proven to provide a high loading capacity whilst creating the correct conditions for plant growth. The selection process of the sand is taken with great care and tested on a regular basis to ensure our product will perform. Particle size and shape is paramount in creating stability and pore space once compacted.
